To Whom It May Concern,

I most highly recommend S.C.Barker Construction Co. for a professional construction team. The staff is most accommodating and the subcontractors used were efficient and proficient in their knowledge of their specialized areas.

This was my first experience at a construction project and I appreciate their attention to details. They were able to answer any questions concerning the project. We had to use the library during construction, moving 3-4 times in the span of 14 months, but their team was most accommodating to our needs.

The quality of their work is outstanding! I'm still amazed daily that we have such a wonderful facility. The high ceilings, the crown molding and the flooring only help enhance the appearance. The quality workmanship can be seen in every area of the library.

With our circumstances where we "lived in" the construction, we had a number of punch lists. As each area was completed the punch list was made and corrected within a timely manner. At the conclusion of construction a final punch list was compiled which was again completed in a timely manner.

S.C.Barker Construction, Co. is a competent construction team. They work for the customer to give them a quality product: a new or renovated building. They are proud of what they do and you can tell by their quality workmanship, by their caring staff and the finished building.

If we had more construction, S.C. Barker Construction would be my choice for that project.

Sincerely,

Nancy Tillinghast
